SHEETS - ELBOWS

Protection sheets, bends and boxes of various shapes and for different needs to apply on the insulated piping surface and other parts of the system, even when access is difficult, such as valves, flanges, gate valves, etc.

FIXING PRODUCTS - KNIVES - ADHESIVES - THINNERS

Easy to use helpful products for cutting, fixing and finishing of the insulation materials installed on the various parts of the plant. The range, which includes components for the application of elastomeric material, PVC e ALU, are also hygienic for the installer.

INSULATION SUPPORTS WITH OR WITHOUT COLLAR

Insulated supports created to guarantee continuous insulation values where fixing is required.

CHRYSSAFIDIS

ΑΝΑΣΤΡΙΑΔΕΣΙΒΙ<

Anti-condensation tape

Synthetic closed cell expanded plastic (elastomer) black rubber tape, 3 mm in thickness, and 50 or 100 mm in height, with an adhesive reinforced surface and disposable protective film.

PVC AT 070 adhesive tape

A special adhesive tape in PVC grey/black. The tapes are available in various sizes.

PE insulating trimming

This is a pure aluminium 30 µ adhesive tape with a smooth surface, adhesive on one side with disposable lining.

ALU reinforced AR 107 tape

This is an aluminium 99,9 adhesive tape of a total thickness of 0,20 µ reinforced with glass wool on adhesive paper with disposable lining.

ALU AA 130 tape

This is a pure aluminium 30 µ adhesive tape, with a smooth reflecting adhesive structure on one side with disposable lining.

Black ALU tape

This is a pure aluminium 30 µ adhesive tape with a smooth structure, adhesive on one side with disposable lining.

White ALU tape

This is a pure aluminium 30 µ adhesive tape with a smooth structure, adhesive on one side with disposable lining.

New ALU color

This is a pure aluminium 30 µ adhesive tape with a smooth structure, adhesive on one side with disposable lining.

FIXING PRODUCTS - KNIVES/SCALPELS - GLUES - THINNERS - PAINTS - HAND WASHING PASTES - VALVE COVERS

A range of specially designed materials to solve sound-proofing problems in both industrial and residential installations. Suitable for applications

in many fields ranging from automotive, music registration rooms, to indoor leisure facilities, air-conditioning and sanitation.

Elbows K90/"T" couplings

Useful accessories used frequently in the insulation of plants, supplied already in the correct shape size and thickness. They only need gluing on the joining edges.
